

the heartbeat of innovation

For our location in Hamburg we are currently looking for a

Trends analyst (Internship/ VIE) (m/w)

6 month

Our projects take place in a wide variety of competence areas. The Altran Aero, Space and Defence industry practice gets the latest technology up in the air by delivering high-end innovation projects to the aerospace and defense business. To support the realisation of these projects and the creation of new solutions, Altran Germany is starting a pilot department for Intelligence Economy.

You can offer us...

You have successfully completed your university education in the field of Innovation Management (IM) focusing on Intelligence Economy (IE)/ Business Intelligence (including trend recognition, scenario creation, and strategy development) or you are still studying in this field and are looking for a true practical challenge to support your graduation. Ideally you gained initial practical experience in IE topics through internships in innovation departments and/or trends offices with focus on technology and transportation fields.

If creativity, curiosity and thinking out of the box are some of your strengths; If you are a team player, have a fresh and positive attitude - THEN JOIN US!

PS: Please, don't forget to bring MS office 2007 and database Skills.

Mission...

To support our activities in the field of product innovation and as part of the cross industry solution "Innovation Management", Altran is looking for you as a Trends Analyst. Your main mission will be to strongly support the creation of our new entity at the Altran GmbH & Co KG, being involved and/or responsible for specific activities such as:

- help creating the process for trends data collection, transformation and implementation;
- collect and analyse trends
- create scenarios
- create and carry out market and product studies, working with our worldwide experts network;
- establish an internal worldwide trends database;
- be part of our creative team during creative sessions

That's us...

Our projects take place in a wide variety of competence areas. The Altran Aero,Space & Defence industry practice gets the latest technology up in the air by delivering high-end innovation projects to the aerospace and defense business. To support the realization of these projects and the creation of new solutions, Altran Germany is starting a pilot department for Intelligence Economy

Please submit your CV and letter of application personally at our stand or apply online at www.altran.de/jobs.

Feel free to call us should you have any questions about your application.
