

If you know how  
to move the world,  
we're listening.

Bombardier Transportation is the global leader in the rail equipment manufacturing and servicing industry. Its wide range of products includes passenger rail vehicles and total transit systems. It also manufactures locomotives, bogies, propulsion & control systems and provides rail control solutions.

In our headquarters in **Berlin**, we are currently offering an:

## **INTERNSHIP (M/F) GROUP PROJECT MANAGEMENT IN THE AREA OF APPLIED MATHEMATICS (Data Mining, Artificial Intelligence or Knowledge Management)**

We offer the opportunity to work in a multicultural environment during an Internship in the Group Project Management department. We are currently looking for a **student of applied mathematics (m/f)**. Start date should be **ideally as soon as possible** and duration is expected to be **3 months** with a possible extension up to **6 months**, which will be set by agreement. This internship could be performed in conjunction with a diploma thesis.

The candidate will be working in a dynamic team, developing a mathematical model or algorithm that will validate the forecasting of performance for projects and portfolios within Bombardier Transportation. All applicants should have a very good command of the English language as a minimum; a good command of German is appreciated.

His/her task will include:

- Identify what information sources are available to possibly measure future single project performance
- Develop an algorithm that specifies current project performance resp. patterns and forecasting scenarios
- Describe the methodology used and document the results
- Provide way forward suggestions as applicable

We are looking for:

- Students currently enrolled in a university of Applied Mathematics or similar
- Proven record of relevant knowledge - e.g. Data Mining, Artificial Intelligence, Knowledge Management etc.
- Interest in Project Management - experience in this field is an asset
- Sense of responsibility, reliability and sociability, communicative character
- Good knowledge of MS Office applications
- Presentation skills
- Team oriented, persuasive and persevering, ability to work independently in an international environment
