## Short-term Research Scholarship for international Postdocs in Technology and Innovation Management

- Are you currently in a postdoc position not more than 4 years after completion of your PhD?
- Do you have a strong track record of research in technology and innovation management?
- Would you like to enjoy a research stay at TU Berlin, focusing on academic paper writing and developing ideas for the next step in your research career?

Then the Technology and Innovation Management Research Group at TU Berlin now offers you a short-term research scholarship, which aims at preparing an EU MARIE SKŁODOWSKA-CURIE Individual Fellowship application.

Our research team is interested in improving the conceptual understanding of organizational and behavioral aspects of innovation management. We seek to enrich management practice through a quantitative empirical approach, validating our conceptually rooted research hypotheses. Projects are placed in different application areas and contexts, like healthcare and pharma innovation, implementation of block-chain solutions, or leadership and organization of distributed research and development teams.

Our research group in technology and innovation management has just recently been established with professor Salomo accepting a chaired professorship at TU Berlin as of January 2018. Hence, we offer the opportunity of becoming part of an entrepreneurial new research team, with ample opportunities for developing interesting research projects in the area of Technology and Innovation Management. For this, we highly value teamwork, engagement, and willingness to experiment. Our research group is part of a larger environment at TU Berlin focusing innovation and entrepreneurship, including [Innovation Economics](#) (Prof. Blind), [Innovation Marketing](#) (Prof. Talke), and [Entrepreneurship and Innovation](#) (Prof. Kratzer). Through our short-term research scholarship, you can become part of an inspiring and excellent international research team and research network. We are located at the heart of Berlin at TU Berlin's main campus embedded in a dynamic local innovation and start-up eco-system. You will find more information about the research group at [www.tim.tu-berlin.de](http://www.tim.tu-berlin.de)

### What we offer

- Short-term (max. 3 month) research scholarship, covering travel, accommodation, and living allowance
- Office space at Technology and Innovation Management research group
- Structured process for discussing and maturing a research idea towards a research application
- EU funding expert support and career coaching (on demand)

### Requirements

- Successfully completed PhD (not more than 4 years after completion)
- Internationally competitive research track record
- Interest in exploring opportunities for an MSCA individual fellowship application (fall 2018 or fall 2019)

For more information about the short-term scholarship please contact Søren Salomo, phone: +49.30.314.26090, Email: [salomo@tu-berlin.de](mailto:salomo@tu-berlin.de)

Please send your informal application with reference to **TIM Research Scholarship** including your CV and publication list to **Søren Salomo, Professor for Technology and Innovation Management, TU Berlin, Fakultät VII, Institut für Technologie und Management, H 71, Straße des 17. Juni 135, 10623 Berlin** by e-mail to [info@tim.tu-berlin.de](mailto:info@tim.tu-berlin.de)
